

Training: Advanced Analytics in Tableau

By Corporate Renaissance Group

Introduction

There are endless innovative ways to visualize data. While basic charts such as bar graphs and heat maps are popular choices, advanced charts may be better suited to present important insight. This session will help users understand and implement useful variations of default graphs and charts to build advanced chart types.

The training session may take place on premise or at a location of choice.

What you will learn

The training session includes the following:

- Building advanced chart types, like water fall, donut charts, Pareto charts, DNA Charts, Bar-in-Bar etc
- Control charts including Bollinger Bands
- Useful tricks and tips
- Many complex use case examples using Tableau sample data

Duration

2 Days

Who should attend?

This course is designed for professionals who have a good working experience with Tableau and wish to improve their advanced analytics skills. Users should have a deep understanding of all the fundamental concepts of building worksheets and dashboards, including calculations.
