Corporate Renaissance Group

CRG - Tableau Data Management Program - 1 Day

Understand Tableau Architecture
Database Connections
Live Connections & Drivers
Initial SQL Statements
Stored procedures
Legacy Connection with excel
Data Preparation
Pivoting data
Data interpreter
Union/merging data
Joining multiple tables (same database vs cross database)
Custom SQL Query & parameters
Data Source Filters
Data Extracts
Why are extracts used?
Understand architecture of TDE files & in-memory concept
Aggregating data and hide unused fields
Refresh Extracts
Full refresh or incremental
Add data from files
Optimizing Extracts
Data Blending
Understanding the concepts
Defining primary group
Troubleshoot data blending
Other Data sources
Published data sources on Tableau server
Clipboard data source
Multidimensional databases (Cubes)
Web data connectors (overview)
Publishing on Server
File vs database connections
Publishing a blank TDE file on server
